REF: E002-8 11-06-08

CONFIGURATION INSTRUCTIONS

Lynx Radio Interface Units can be configured to operate with several types of radio.

To re-configure an Interface, first remove the back of the unit by unfastening the four retaining screws. Situated on the circuit board inside the unit, is an eight-way switch which should be set in accordance with the following diagrams.

After configuration always re-label the interface unit to indicate its present setting.
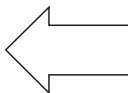

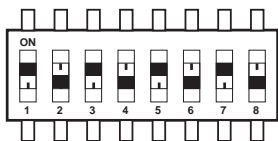

WARNING:

Incorrect configuration may damage the unit and any radio which is connected.

Opening the back of a Lynx Radio Interface invalidates the guarantee.
