

VISOR EXTENSION (TYPE 2)

REF: E047-1 24-11-06

INSTALLATION INSTRUCTIONS

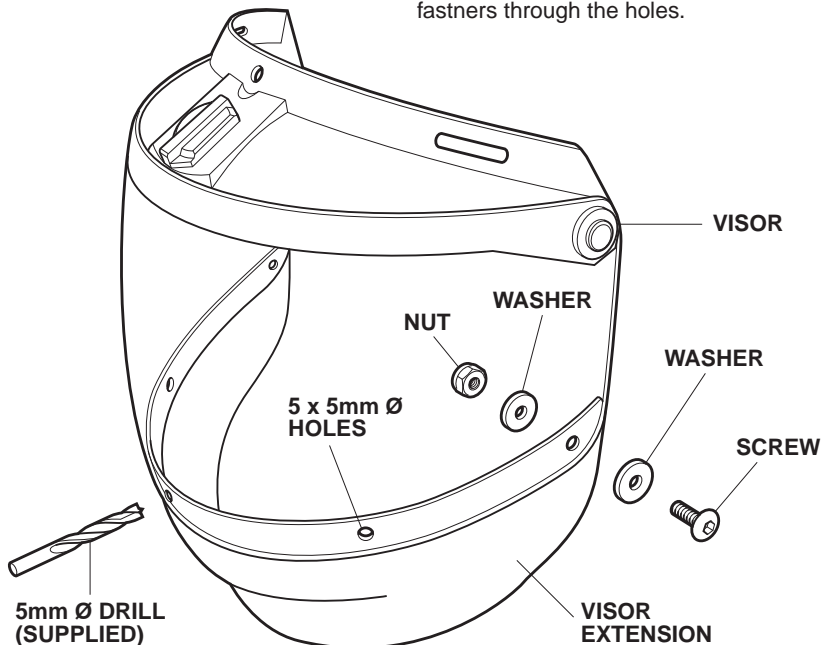

WARNING:

This visor extension is only suitable for use with visors and helmets that have been supplied by Lynx Avionics.

The extension and the fasteners are designed to be fitted once only and may become loose if re-used.

1. Place the visor extension in position against the visor and mark the centres of five fixing holes.
2. Drill the fixing holes through both the visor and the visor extension.
3. De-burr the fixing holes and clean away any swarf.
4. Re-assemble the parts and install the fasteners through the holes.
